Fully-Integrated Engineering At Your Service

Above:
Complex fabrications with exotic welding procedures are no problem at A&G Price

Below:
The workshop has full non-destructive testing (NDT) facilities

A&G Price Ltd's dedicated fabrication and heavy machining facilities are available 24 hours a day for essential refurbishment work, and are fully equipped for all machining, welding, fabrication, metallurgical and NDT inspection, assembly, custom finishing and commissioning needs. The company prides itself on its depth of experience and has a proven ability to fabricate to military and marine specifications.

A&G Price utilises a comprehensive 1400m² fabrication/welding shop equipped with two 10-tonne cranes (5.9m under hook), and an 1100m² fitting area with a 7.5-tonne crane (5.5m

under hook). Equipment includes heavy rollers able to form 25mm steel plate, a guillotine capable of cutting 12mm steel plate, and a press brake able to bend 16m steel plate — all handling material up to 3m wide.

The company is able to undertake a range of weld procedures, including MMA, MIG, subarc, flux-cored, TIG and exotic weld overlay. Stress-relieving ovens, sandblast and spray paint facilities are also available, along with full engineering support, including in-house design with CAD drawing and 3-D modelling capabilities.

As a fully-integrated engineering works, A&G Price is able to eliminate the need for subcontractors, and so guarantee the high quality and timely completion of all projects — just another example of its commitment to delivering the world's finest engineering solutions to its clients.

Capabilities Offered

- Flexible hours and shift work
- Wet spec paint systems and belzona application
- 3D machining
- Heat treatment facility
- Engineering design
- Telarc ISO 9001: 2000 registered
- Project management
- SM2-qualified NDT personnel
- Foundry and metallurgical facility
- Stainless and bronze
- White metal bearings
